

Kay Stephenson has over 30 years of experience in the information technology market. She is Co-founder, President and CEO of Datamaxx Applied Technologies, Inc. (Datamaxx), headquartered in Tallahassee, Florida, one of the largest providers of advanced communications, data access, and security solutions to the public safety and security markets.

Kay Stephenson and Datamaxx have been recognized with a number of awards including the Florida Governor's Business Leadership Award, New York City Wireless Project of the Year, Women of Distinction Award in Technology, Entrepreneurial Excellence Award, Florida International Magazine Power Players of Florida, IACP Excellence in Technology, and as one of the Top 50 Women-Led Businesses in Florida every year since 2009.

Kay currently serves as Chair of the Integrated Justice Information Systems (IJIS) Institute Board of Directors, member of the Board of Trustees of the Florida State University Research Foundation, and member of the Advisory Board to the Florida State University Computer Science Department. She is an active member of Women in Homeland Security and InfraGard, two critical programs that support and further the protection of the nation's infrastructures and national security. Kay served for eight years on the Board of Directors of the Tallahassee-Leon County Council on Culture & Arts, including serving as Chair. She also served a full term on the United Way of the Big Bend Board and the Tallahassee-Leon County Economic Development Council.
